BUILT IN QUALITY

INTRODUCING ICB GROUP

ROOFING SYSTEMS FOR ARCHITECTS, MAIN CONTRACTORS, ROOFING CONTRACTORS, DEVELOPERS & PRIVATE CLIENTS.

/ 3

Over 40 years of delivering high quality products supported by a highly professional team of technical experts - with sustainability and innovation at the heart.

ICB (Waterproofing) Ltd is one of the UK's leading providers of waterproofing solutions, specialising in flat roofing projects. We offer a range of waterproofing solutions, including **Reinforced Bituminous Membranes** and **Liquid Applied Waterproofing systems**, but our strongest expertise lies in **Single Ply Membrane solutions** where we are the UK's exclusive distributor of alwitra®, a world-leading system of integrated components offering perfect roofing solutions for new build and refurbishment projects.

Through our sister company, **ICB (Fabrications) Ltd**, we can offer bespoke metal fabrications and provide these in mill finish or polyester paint coated to any RAL colour desired.

ICB (Projects) Ltd provides design, supply and installation of ancillary products for flat roofs: Solar PV, Green Roofing, Battery Storage, Roof Edge Protection, Rooflights and Smoke Vents.

All with the benefit of a single point warranty.

The Group has developed an enviable reputation for supplying and installing quality products, reliability and technical excellence – a market leader setting the pace for the rest of the roofing industry.

Carbon Zero - ICB has offset its entire carbon footprint to achieve the Carbon Zero standard.

- ✓ Fully accredited systems
- ✓ High quality solutions
- ✓ Single Point warranty
- ✓ ISO Accreditation and members of leading trade associations

ICB WATERPROOFING

UK DISTRIBUTOR OF **alwitra**[®]

ICB WATERPROOFING - SOLE UK DISTRIBUTOR OF **alwitra^a** / 5

The alwitra[®] range is an ethylene-vinyl-acetate (EVA) single ply membrane, which results in an extremely stable product, free from potentially harmful volatile plasticisers.

With excellent chemical resistance, **alwitra[®]** provides a reliable protective membrane against inclement weather to ensure buildings remain protected for years to come.

alwitra[®], distributed exclusively in the UK by ICB Waterproofing, are industry leaders in high-performance single-ply flat roof systems, trusted for over 40 years by architects, contractors, and developers.

Fully certified, BBA-approved, bitumen-compatible, UV-stable, and root- and fire-resistant—delivering unrivalled durability and flexibility across diverse applications. The range includes self-adhesive options, recyclable EPDM systems, and integrated solar membranes, offering lightweight, weatherproof renewable energy solutions.

alwitra[®] systems go beyond waterproofing with a complete suite of roof-edge profiles, rooflights, drainage, vents, and accessories—all engineered for seamless integration, long-term performance, and architectural refinement.

The products are backed by 25-year guarantees, ISO standards, and comprehensive technical support, including CAD design, NBS specifications, and accredited installer networks.

From complex detailing to full system builds, **alwitra[®]** offers sustainable, high-spec roofing solutions trusted on schools, hospitals, commercial buildings, and residential developments across the UK.

ICB WATERPROOFING

EXPERTS IN WATERPROOFING SYSTEMS

A comprehensive range of single ply membranes, liquid applied systems, and reinforced bitumen membranes.

The use of Single Ply Membranes is an established method of waterproofing for flat roof areas. Different options are available from ICB, depending on the specific requirements of the particular application. Each product can be adhered, mechanically fixed or ballasted into flat roof.

- ✓ Over 40 years' experience in the UK market
- ✓ Products have been tried and tested again and again, where it really matters
- ✓ Fully ISO accredited in Quality, Environment and Health & Safety
- ✓ Up to date through memberships such as the NFRC, SPRA, LRWA and BFRA
- ✓ High quality products for every flat roof application
- ✓ Local network of experts for technical advice and support

SECUTOP

A PVC based single ply waterproofing membrane tested to ensure the highest quality standards. Available in both fleece-backed for fully adhered applications and a fibre-reinforced version for mechanical fixing.

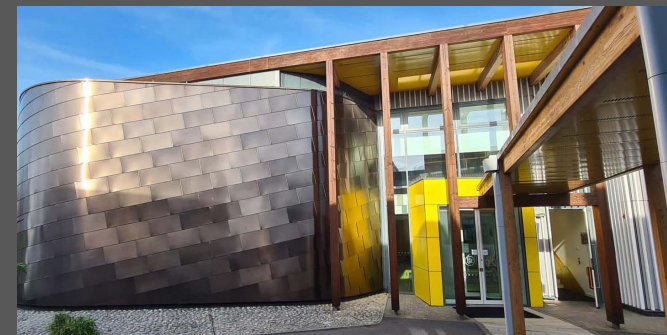

STRATA

STRATA APP and SBS modified bitumen torch-on membranes are easy to apply, provide good flexibility in cold conditions and have a high resistance to heat and UV rays. For all types of flat roofing applications.

FLEET

The Fleet Liquid Applied Waterproofing System directly moulds itself to the contours and changes of plane of the substrate. The FLEET LAW system is 'Rain-Secure' in 30 minutes with a life expectancy of up to 25 years and beyond (attested by the BBA).

ICB FABRICATIONS

BESPOKE ARCHITECTURAL ALUMINIUM SPECIALISTS

Helping specifiers realise their project vision to the highest standards, satisfying even the most challenging of briefs.

For unique or complex projects our bespoke fabrication capabilities are second to none. At the centre of operations is our custom-built fabrication facility, where we are able to produce and powder coat a vast range of architectural profiles and components for a wide range of applications.

Alternatively, choose from our extensive profile range encompassing Aluminium Fascias, Cappings, Claddings, Cills, Flashings, Soffits, Rainwater Goods, Window Reveals and Green Roof Products all of which can be polyester powder coated to any RAL colour of your choosing.

All solutions offer exceptional outcomes in design accuracy, operational performance, installation ease and environmental impact. For your assurance, we are ISO accredited for quality, environment and health & safety.

Whilst aluminium offers many advantages, we can fabricate building elements using a wide range of other materials including membrane-

coated aluminium or stainless steel and galvanised steel. Our team is as capable as it is willing. You can rely on our knowledge, expertise and technical excellence to deliver cost-effective solutions on time, every time.

All fabrication is carried out on-site, significantly reducing transport requirements and helping to lower our overall carbon footprint. Combined with our use of recyclable materials and durable finishes, this supports more sustainable construction practices without compromising on performance or quality.

Bespoke
Fabrication

SAFE, SUSTAINABLE, SMART ROOF ENVIRONMENTS

Specialist providers of safe, sustainable, smart roof environments, solutions include all aspects of green, brown and blue roofs, Solar PV, energy storage systems, roofline and roof safety.

Solar PV Systems

ICB Solar is a division of ICB Projects specialising in developing smarter, innovative solar PV offerings uniquely tailored to each project's requirements. Our particular strength is in enabling NHS, academic and commercial buildings to reap the rewards of generating their own energy, as practically and efficiently as possible.

We offer a complete solution including survey, calculations, design & technical (CAD), supply & installation, all backed up by industry-leading guarantees as an ISO accredited specialist. They are fully accredited and so quality is assured.

Installation of Bespoke Fabrications

ICB Projects are responsible for the installation of bespoke fabrications for ICB Fabrications.

- ✓ Full System Solutions
- ✓ Simplified warranties
- ✓ Reduced manufacturer interfaces
- ✓ Fully vetted

Green Roof Systems

EvaGreen is the ultimate green roof system, developed to meet every type of ecological specification from low-maintenance installations to elaborate intensive planting.

Rooflight & Access Systems

We offer a wide range of rooflight and access solutions - supply, design and install barrel vaults, domes, roof hatches and smoke vents, providing natural light and safe, convenient access to roof areas.

Roof Safety Systems

We offer a comprehensive range of roof safety solutions - supply, design and install **Fall Arrest Guardrail** and **Balustrade Systems** delivering safe working access to roofs without compromising on design.

Single Point Warranty

Specifying waterproofing, bespoke fabrications and sustainable roof solutions from the ICB Group means benefitting from a **single point warranty**.

NATIONWIDE TECHNICAL SUPPORT

ICB Group have expert regional technical support, across the UK on-hand to assist you with every project at every stage.

At ICB Group, we pride ourselves on delivering expert regional technical support across the UK. From initial concept to project completion, our team is on hand to assist at every stage, ensuring a smooth and successful outcome every time.

When you work with us, you're not just getting industry-leading products—you're getting a dedicated service. Each client is personally assigned a Regional Technical Manager (RTM), who can add their decades of experience in the roofing industry to your project. Your RTM will be your single point of contact, offering in-depth technical and product knowledge across our full range of solutions.

Every aspect of your project is supported: including all ancillary elements such as fabrications, green roofs, solar PV systems, and roof edge safety solutions. Our commitment to quality continues on-site, with Regional Field Technicians available locally to provide inspections, quality control, and technical support whenever needed.

Our service doesn't end with installation. Whether it's an initial survey, mid-project assistance, or a post-completion quality check, our Regional Field Technicians are always nearby and ready to help. At ICB Group, we work closely with you throughout your project, making sure every detail is covered and every stage runs seamlessly.

TRAINING TO BOOST YOUR BUSINESS

With extensive industry experience and a range of products to meet every type of roofing application, ICB's training courses will develop both the practical and technical expertise of you and your team.

alwitra® Single Ply 3-Day Training

This BCP approved 3-day training course covers theory, site safety, practical exercises and a final test. To participate in this training course we require the participant to have some roofing experience.

alwitra® Single Ply 1-Day Training

This 1-day training course focuses on practical training in the specific use of this membrane type. Proof of previous experience, with a minimum of 2 years recent single ply membrane installation experience is essential.

Fleet Liquid Applied PMMA Based 1-Day Training

This 1-day training course covers practical, health, safety & welfare with Q & A to finish. Previous knowledge is preferable but not essential.

Reinforced Bitumen Membrane 1-Day Training

This 1-day training course covers practical training. Proof of previous experience of Bituminous Felt products is essential in order to qualify for the 1-day course.

ACCREDITATIONS

ICB Group are proud to hold a wide range of industry accreditations and certifications, reflecting our commitment to quality, safety, and best practice across everything we do.

TESTIMONIALS

"Working with ICB has been a game-changer for our business. We've been using alwitra for years, and the quality of the membrane speaks for itself. The expert support is second to none, and they truly understand the demands of site work. They know what contractors need, they go above and beyond to help, and they deliver every time."

MHT ROOFING

"The service has been outstanding accommodating every request which has been very challenging."

The nature of our work means that delivery schedules are often very tight, and the precision engineered bespoke parts that we make can mean turnaround on the parts is very time sensitive and at short notice...

You've been added to our preferred suppliers list."

FLANN MICROWAVE

"I've worked with ICB for the last 5 years and only have good things to say about the customer service and products that I have received. Having just one company to deal with from start to finish not only makes my life easy but clients love that it is under one roof as well."

LANYON DEVELOPMENT

"We have worked with ICB on several occasions and we would thoroughly recommend them for their high level of professionalism and efficiency. The team are very knowledgeable, helpful and resourceful, and always deliver on their commitments."

OB ARCHITECTURE

"We find all the staff at ICB, friendly, helpful & knowledgeable."

S&P ROOFING

"I am pleased to recommend ICB Fabrications for the following reasons:

They are an easy Company to deal with, always responding to calls. Whenever we need their help, they don't just offer help, but try to take ownership of their involvement, assistance and advice.

ICB are responsive and attentive. In instances where the solution to a customer's problem has not been straight forward, ICB have made available their broad range of facilities and expertise to help engineer and see through an appropriate resolution.

ICB treat their employees and customers like human beings. Even if a problem does not involve ICB materials or services, directly, in their loyalty to their customers, ICB still will help out."
